*Empowering spatial thinking of students with visual impairment*

---

## ABOUT

---

VISTE Community constitutes a collaborative online environment for creating, exploring and sharing resources for inclusive learning settings. It has been developed in the framework of Erasmus+, KA2, [VISTE Project](#) (2016-1-EL01-KA201-023731) for empowering spatial thinking skills of students with visual impairments.

The VISTE Community exploits the [GEOTHNK Community and Authoring environment](#) while it incorporates new innovative features which encompass needs of students with visual impairments, including an augmented reality tool that allows VI and sighted students and teachers to collaboratively explore and build accessible maps.

Go to the [Get Started](#) tab to find out how to participate in the VISTE Community.
